

Product Discontinuation Notice CT Liner

Dear Valued Customer,

After careful consideration, Security Chimneys will be discontinuing the manufacture and sale of the CT Liner. April 15, 2019 will be the final date of availability.

The discontinuation of CT Liner keeps with our practice of rationalizing low demand products. In doing so, it allows us to keep our product offering relevant to the demands of our customers.

We appreciate and value your partnership. We regret any inconvenience this announcement may cause.

Security Chimneys is happy to announce that the SCL model of Secure Stack® Pro is the replacement liner. The SCL offering of Secure Stack® Pro is a superior replacement, offering a large range of diameters to cover more applications.

Key highlights of the SCL model of Secure Stack® Pro are:

- 5"-36" product offering.
- Available in either 316 or 304 stainless.
- Easier to install and a wider range of products available.
- Interchangeability within the Secure Stack® Pro line allows for more flexibility and availability of parts.

If you have any questions or concerns regarding these changes, please kindly contact the Security Chimneys Customer Service Department at customer.service@securitychimneys.com or 1-800-667-3387 (Canada) or 1-800-361-4909 (US).

Security Chimneys would like to thank you for your understanding and continued support.
